

BUILDING SYSTEMS

-INCLUDED IN YOUR LOG HOME KIT-

QUALITY and ASSURANCE

- Log walls are machine-milled select Eastern White Pine designed according to the style log you have chosen. Wall logs are individually graded to meet or exceed the industry standard ASTM D-3957 rating.
- Components are pre-cut and numbered for easy identification and assembly.
- Kits feature a unique wall adjusting system to keep your log walls tight during and after the settling process, ensuring a sturdy and snug structure for generations to come.
- A wide selection of standard home models are available; or floor plans can be customized and kits manufactured to suit your individual needs.
- On-site technical assistance is provided to get you started and keep you on the right track.
- We save you money by eliminating the middle man, thus allowing you the highest quality at the most affordable price.

North Fork Lumber & Log Homes is among a select few manufacturers who can take home construction from start to finish. We have the capability of logging standing timber in the forest, or from the buyer's own land, then processing the logs into unique home packages, all assembled and finished on-site using our experienced team of builders.

- 1 Log Wall System:** All wall logs are pre-cut to length and numbered for identification. Also included are log wall rods with springs, installation hardware, fasteners, saturated foam gaskets and log home caulk.
- 2 Window & Door Framing System:** Pre-cut 2" jambs, with sills and headers.
- 3 Loft Framing System:** Pre-cut joists, girder beams and support posts. Includes black metal hardware required for installation.
- 4 Roof Framing System:** Pre-cut rafters, ridge beams, support posts and rafter collar ties and plates.
- 5 Dormer Framing System (as required):** Pre-cut rafters, sills, headers and support posts.
- 6 Porch Framing System:** Pre-cut rafters, sills, sill returns, headers, 6x6 foundation and support posts, 2x8 joists and 5/4 decking.
- 7 Trim Lumber:** Surfaced trim lumber is included for fascia, interior base log, window and door openings.
- 8 Log Siding:** For covering subfloor and band boards. Log Siding or Board & Batten for exterior gable ends, dormers and windstops.
